REFRAME TRAVEL

In the modern world, it can seem like every inch of existence has already been explored. To travel with National Geographic-Lindblad Expeditions is to change that point of view—to realise that exploration isn't actually about seeing places that nobody else sees; it's about seeing places differently

For over two decades, National Geographic and Lindblad Expeditions have collaborated to redefine travel for those who seek unique adventures that inspire awe. Together, they offer more than 100 expedition cruises in over 70 countries across six continents. Every voyage brings together the legacy of National Geographic, with its long commitment to sharing and protecting world wonders, and the unparalleled expertise of Lindblad Expeditions, with its 50+ years of pioneering travel to the planet's remote and wild places.

These are voyages that inspire you to see more, learn more and do more. And when you seek more with National Geographic-Lindblad Expeditions you find it: that change in perspective that changes everything.

EXPERIENCE THE WORLD FROM A NEW PERSPECTIVE

WITH NATIONAL GEOGRAPHIC-LINDBLAD EXPEDITIONS

For more than 20 years, National Geographic and Lindblad Expeditions have collaborated to connect curious travellers with transformative experiences. These pioneers defined modern expedition travel, and now they are setting new standards with immersive and illuminating voyages, where every element of the experience inspires genuine discovery.

SMALL SHIPS THAT TAKE YOU FURTHER

With 12 expedition ships and 9 chartered vessels, the National Geographic-Lindblad Expeditions fleet is the most versatile in expedition cruising. Each small and efficient expedition ship was designed to take you deeper into the planet's most remote places using sustainable fuels and emerging technologies that optimise efficiency. Beautifully designed charters bring you to historic ports and legendary rivers, inviting you to explore them in unique ways.

TAKE GREAT PHOTOS WITH THE PROS

National Geographic photographers have spent decades travelling the globe, capturing the world's most impactful images. They join select expeditions, and a National Geographic-Lindblad Expeditions certified photo instructor joins every departure, helping travellers hone their camera skills in captivating places.

INSPIRING THE NEXT GENERATION OF EXPLORERS

Available on select itineraries, the National Geographic Global Explorers programme* nurtures the next generation of global stewards in fun and fascinating places. Certified field educators help kids connect with nature in a deeper way, sending them home with a passion for the planet that lasts a lifetime.

**On select Iceland itineraries, this programme is called National Geographic Expeditions Adventurers.*

REVEALING UNDERSEA WONDERS

On most departures, an undersea specialist brings your destination's marine wonders to the surface by capturing and sharing underwater footage. During nightly recaps, the specialist interprets sea creatures and geological features, offering insights integral to the story of your destination.

PIONEERING RESPONSIBLE EXPLORATION

Travel with peace of mind knowing the fleet is optimised to limit its environmental impact and that each voyage gives back to protect the natural and cultural heritage of your destination through the Lindblad Expeditions-National Geographic Fund. To date, the fund has invested more than \$24 million to projects aimed at preserving the world's oceans, restoring critical marine and coastal habitats and fostering environmental stewardship.

AN ESSENTIAL GUIDE TO EXPEDITION CRUISING

Expedition cruises are driven by the desire to explore fascinating places while enjoying an engaging onboard experience that connects you more deeply with your destination. Here, the leaders in expedition travel answer your questions about what to expect aboard the National Geographic-Lindblad Expeditions fleet.

What is an expedition cruise, and how is it different from a traditional cruise?

A traditional cruise follows a schedule with pre-set excursions. Instead of focusing on the world outside, the ship serves as a floating resort, emphasising the holiday life on board.

An expedition cruise takes place on a small ship designed to navigate hard-to-reach places, yet prioritises comfort and well-being. Guests engage in up-close exploration, learning about nature and culture from a dynamic onboard expedition team. The voyage is driven by discovery, with the captain and expedition team members working together to find the most exciting opportunities presented by nature.

Where do expedition cruises sail?

Just about anywhere deep and wide enough to navigate, and far from busy ports and piers—that means small Mediterranean harbours, narrow Alaska fjords and beyond. Highly seasoned crews seek out lesser-visited shores for an authentic and personal experience.

Learn more

To see the complete list of frequently asked questions from travellers who are new to the fleet, visit expeditions.co.uk/guide

How do you explore on an expedition cruise? What does a typical day look like?

An expedition cruise gives you options to explore your way, and there are often several excursions offered each day. You might start your morning with a Zodiac or kayak outing. After lunch, you could go for a hike, visit an historic site or simply watch for wildlife on deck. During the evening recap, your expedition team will highlight exciting discoveries so you can learn even more about what you saw that day.

Who are your guides on an expedition cruise?

Expedition teams are made up of world-class naturalists, photographers, cultural experts, undersea specialists and others who give context to the places you explore. Each team is curated for the voyage so that you get in-depth perspectives from veteran and locally based guides.

What types of travellers would enjoy an expedition cruise?

Anyone who travels to experience and learn through engaging activities. With daily adventures that are fun for both kids and adults, families are a natural fit. Solo travellers will find a welcoming community on board, and guests of all ages can opt for low-impact activities and enjoy a rewarding experience.

LIFE ON BOARD

Each ship in the National Geographic-Lindblad Expeditions fleet is a destination in its own right, featuring amenities to ensure that your time on board is equally rewarding as your time on shore—from the art and décor to the culinary delights and soothing spa treatments sourced from your surroundings.

SAVOUR THE FLAVOURS OF YOUR DESTINATION

Your ship's executive chef designs unique and innovative menus that feature sustainably sourced dishes inspired by the regions you visit as well as guided wine tastings to enhance your culinary experience.

WELLNESS AT SEA

Dedicated onboard wellness spaces—such as treatment rooms, saunas and fitness centres—encourage you to tap into the natural rhythms of your surroundings. Treatments are tailored to individual needs, and each fully accredited wellness specialist is also a licensed massage therapist.

SUITE EXCLUSIVES

The Suite Exclusives package gives guests staying in eligible cabins access to an array of amenities designed to enhance your onboard experience, including priority booking for spa treatments, an in-room espresso maker, complimentary laundry and other exclusive perks.

WHAT'S INCLUDED

Voyage inclusions are curated to foster a complete expedition experience for incomparable value, providing everything you need to explore your destination to the fullest and eliminating the unnecessary. Pricing includes:

- Unlimited activities and excursions.
- Ship-based amenities, such as saunas, hot tubs, fitness studios and libraries.
- Onboard enrichment, including naturalist lectures and exclusive kids programming.
- All meals, including nightly hors d'oeuvres and 24-hour access to snacks.
- Complimentary beer, wine, cocktails and spirits aboard the expedition fleet and most chartered ships. A selection of super premium wines and liquors is available for purchase.
- Extras to meet your every need, from airport transfers to basic Wi-Fi, park permits and just about anything else you can think of.

TRAVEL WITH NATIONAL GEOGRAPHIC EXPLORERS

For over a century, National Geographic Explorers have revealed the beauty and wonder of the world through masterful storytelling. From archaeologists and historians to marine biologists, these experts have received grants, fellowships or awards from the National Geographic Society to advance the important work they do in their fields. They travel aboard select departures, sharing insights with guests or using the ships to conduct research as part of the fleet's Visiting Scientist Programme.

*National Geographic Photographer
Kike Calvo instructing a guest on
capturing Karukinka National Park in
Chilean Patagonia.*

David Doubilet, Marine Biologist

A photojournalist focused on oceanic environments, David Doubilet has contributed more than 70 feature stories to *National Geographic Magazine*. Doubilet has been called the “Audubon of the Sea” for using photography as a voice for the vanishing ocean. He is currently documenting at-risk UNESCO World Heritage marine sites.

William Saturno, Archaeologist

William Saturno specialises in the myths and histories of early civilizations. A former NASA research scientist, he has conducted fieldwork around the globe—both on the ground and from space—to understand the foundations for great empires of the past, weaving together archaeological, anthropological and historical data.

Natalie Catherine Sinclair, Marine Biologist

Natalie Sinclair is a Scottish marine biologist who conducts animal behaviour research and conservation monitoring using non-invasive research technologies, such as bioacoustics. In 2019, Sinclair received a Lindblad Expeditions-National Geographic Fund grant to examine the cultural evolution of humpback whale songs in the Cook Islands.

Santiago Ramírez Said, Botanist

Colombian Lebanese botanist Santiago Ramírez Said works on the sustainable development and conservation of Indigenous peoples across the Americas. He collaborates directly with communities in places like Panama and Colombia to protect their cultural practices, storytelling traditions and historical uses of native plants.

Brian Kastl, Ecologist

Dr. Brian Kastl leads aquatic conservation projects across the Pacific, leveraging local knowledge to study fisheries, rivers and reefs. In 2019, the Lindblad Expeditions-National Geographic Fund supported his work to protect endangered coho salmon by tracking their migrations with microchips in the Russian River of California.

VOYAGES OF DISCOVERY

Antarctica. The Galápagos Islands. The Greek Isles. Certain places in the world have the power to captivate through the ages. In these timeless destinations, National Geographic-Lindblad Expeditions designs itineraries to take travellers closer to iconic sights—and to reveal fresh perspectives on their historic resonance and enduring appeal.

Clockwise from left: A Galapagueño guide tells a guest about Galápagos giant tortoises; surfacing humpback in Antarctica; guests take advantage of long daylight hours in Alaska to photograph the setting sun; the mythical birthplace of Apollo on Delos Island.

At their core, the voyages featured in the following pages tap into the rich legacy of National Geographic, bringing you straight into the pages of the renowned magazine to live the scenes captured by their brilliant photographers and storytellers. Destinations like Alaska and Costa Rica show nature at its wildest, while places like Turkey and Croatia tell the stories of ancient civilisations.

Set out on a voyage of discovery in one of these legendary places, where National Geographic-Lindblad Expeditions is uniquely suited to be your guide. The fleet's explorers, photographers and expedition teams have been discovering these destinations for decades, with a collective mission of preserving them for generations to come. Whether you seek to voyage solo or with family, embark on a short escape or an epic journey, the fleet has engaging offerings for every type of traveller.

Visit expeditions.co.uk to see the complete collection of itineraries by National Geographic-Lindblad Expeditions.

GALÁPAGOS

In 1967, Lars-Eric Lindblad led the first-ever expedition cruise to Galápagos for international travellers, ushering in a new era of exploration for the archipelago. That voyage laid the foundation for ecotourism on the islands and initiated a rich tradition of taking travellers deep into an astonishing wildlife sanctuary to discover it from every possible angle.

For decades, National Geographic-Lindblad Expeditions has built relationships in the Galápagos, and today, residents and scientists serve as naturalist guides, guest speakers and hosts for island excursions, providing the most authentic experience possible.

These are voyages born from knowledge gained over 55+ years of exploration—and they celebrate every part of this special place, from the wild sea to the stars above and the volcanic landscapes and vibrant communities in between. Whatever experience you seek in the Galápagos, you'll find it aboard a diverse fleet of four expedition ships, where you'll be privy to the best-kept secrets of this world-renowned destination.

A DAY IN GALÁPAGOS

The animals of the Galápagos are unusual, unafraid and overwhelmingly endemic, and observing them with knowledgeable guides is the hallmark of your experience.

Early Start: Rise and Roam

Greet the day on the top deck, practicing sun salutations with a wellness specialist, or head to the bow to look for early-morning wildlife activity alongside expert naturalists. Young travellers in the National Geographic Global Explorers programme can begin recording the day's sightings in their official field notebooks.

A Farm-to-Table Breakfast

A fresh breakfast awaits in the dining room: bespoke omelets, a rainbow of fruits and juices, Galápagos-grown coffee and more—much of it sourced from local farms as part of the fleet's pioneering farm-to-table programme.

Morning Excursion: Dive In

Snorkel in the Galápagos Marine Reserve, home to an array of captivating creatures: sea lions, technicolour fish, marine iguanas and feeding penguins. Prefer to stay dry? Join a naturalist in a Zodiac or glass-bottom boat for a cruise through a shallow bay to observe marine life at water level.

Talks and Photo Tips

Back on board, join a naturalist or National Geographic certified photo instructor in the lounge for an engaging talk or a photo tips session. Or head to the fitness centre, relax in a hammock on deck or read up on Charles Darwin in the library.

A Local Lunch

Every meal on your voyage is fresh, sustainable and locally sourced—but one lunch stands out: a special Ecuadorian feast, with dishes from the country’s coasts, islands and highlands. The golden roast suckling pig from Isla Floreana is a highlight, as is the wild-caught fish in coconut milk.

Afternoon Excursion: Paddle, Hike or Walk

Paddle a kayak or stand-up paddleboard along the coast for a closer look at fascinating volcanic features and textures. Or head ashore with your camera in hand for a wildlife photography walk. Sightings depend on the island—but keep a lookout for blue-footed boobies or waved albatrosses performing their elaborate courtship dances, and flightless cormorants diving for fish.

Sunset Equator Crossing

Head to the observation deck at sunset for a celebratory tasting of local wines as the ship navigates across the Equator.

Ready for Recap

Meet in the lounge over drinks and hors d’oeuvres, and settle in for the daily recap, featuring presentations and photo slideshows on the day’s adventures and a preview of tomorrow’s activities.

Seeing Stars

After a delicious dinner, bring your binoculars to the top deck for a naturalist-led stargazing session. You’ll have the rare opportunity to see the Big Dipper and Southern Cross at the same time—a phenomenon that only happens at the Equator.

The Galápagos Islands are filled with endemic species found nowhere else on Earth, and their lack of fear often allows you to observe them at length.

ANTARCTICA

Sculpted by ice and scarcely explored by humans, Antarctica ranks among the planet's greatest travel conquests. In 1966, Lars-Eric Lindblad brought the first tourists here, launching expedition cruising on the seventh continent.

The fleet has been refining Antarctic travel ever since that pioneering voyage more than 55 years ago—decades longer than any other operator. Today, National Geographic-Lindblad Expeditions sails four powerful polar ships here, each helmed by a veteran “ice master” captain with extensive experience navigating Antarctic waters.

Season after season, expedition teams work diligently to better understand this otherworldly place, seeking out new ice fields and wildlife colonies, mapping safe routes and anchorages and expanding the boundaries for exploration so you can enjoy days filled with adventure.

Embark on the journey of a lifetime with the leaders in Antarctic expedition travel, and make the most out of every precious moment at the bottom of the globe.

A DAY IN ANTARCTICA

Blaze your own trail at the bottom of the globe, discovering kingdoms of sculpted ice and their cold-weather creatures by kayak, Zodiac, on foot and more.

Early Risers: Wake up to Icy Views

Head to the bow and soak in the icy stillness of the seventh continent before the rest of the ship awakens. You're likely to meet a naturalist who aids in the search for wildlife, including killer whales, humpbacks and wandering albatrosses.

Breakfast at the Bottom of the World

Breakfast awaits in the dining room, where every meal is complemented by panoramic views of Antarctica's volcanic shores. Fuel up with fresh pastries, hot coffee and a sampling of dishes from the buffet.

Morning Excursion: Gear Up for Adventure

Opt for one or several activities at the morning landing site. Climb to the edge of a glistening glacier, then take a leisurely walk to a gentoo penguin colony, where a naturalist interprets each behaviour. Kayakers will set off from the ship or shore, paddling amid the iridescent icebergs that float through nature's sculpture garden.

Lunch Is Served

Select from a menu of diverse options that can be tailored to your taste and dietary preferences. Many lunches start with a robust soup to ward off the Antarctic chill.

Talks and Photo Tips

Attend a talk in the lounge by your National Geographic photographer or take advantage of the ship's amenities: read up on Ernest Shackleton in the library, test out high-tech cameras and lenses from the complimentary OM System Photo Gear Locker or visit the open Bridge to chat with the captain about the unique challenges of polar navigation.

Afternoon Excursion: Into the Wild

In Antarctica, you'll discover something unexpected daily. In the early season, the captain may disembark travellers on the fast ice so you can walk across the frozen sea. Opt to take the polar plunge, followed by warm blankets and steaming hot chocolate provided by the crew. Young travellers in the National Geographic Global Explorers programme may be invited to participate in a plankton tow.

Ready for Recap

Meet in the lounge over drinks and hors d'oeuvres, and settle in for the daily recap, featuring presentations and slideshows on the day's adventures and a preview of tomorrow's activities.

Dinner: Zero-Waste Tasting Menu

Every voyage includes special dining events, such as barbecues or guided wine tastings. Those travelling aboard *National Geographic Endurance* or *National Geographic Resolution* are invited to a special private dinner that features a refined seven-course tasting menu.

Midnight Zodiac Cruise

The evening sun often paints glacial hues in brilliant pinks and the skies a fiery orange. On nights like this, your expedition leader may invite guests for a midnight Zodiac cruise to soak up the spectacular scenery.

Zodiacs allow you to explore at water level, bringing you up close to the wonders of the wild world.

ALASKA

More than 40 years ago, Sven Lindblad chartered a floatplane in Southeast Alaska to seek out places only accessible by small ship—the first step in bringing travellers to the wildest parts of America’s frontier. Today, millions of people flock to the region each spring and summer to experience its legendary wilderness, but a relative few actually explore it.

Alaska holds the promise of discovery, and National Geographic-Lindblad Expeditions is constantly seeking out new inlets and coves to explore. Each vessel was specially designed to sail these waters—and each is U.S.-flagged, eliminating the need for customs stops and allowing you more time in the wild.

Venture far beyond the busy ports and piers to roadless places where glaciers sparkle, mountains soar and epic wildlife roams—bears and bald eagles, harbour seals and humpbacks. You’ll be immersed in pure Alaska wilderness, experiencing it from an angle without another ship or soul in sight.

A DAY IN ALASKA

Pair four decades' worth of experience with a range of tools for active exploration and you unlock an authentic Alaska adventure.

Breakfast: Savour Your Meal, Soak in a View

Epic scenery is everywhere in Alaska, and at a fjord-side breakfast, you might be treated to views of tumbling waterfalls or electric-blue icebergs as you enjoy fresh bread and pastries, a made-to-order omelette or other hot dishes from the buffet.

Morning Excursion: Exploring at Water Level

Join a naturalist aboard a Zodiac and speed toward a glistening glacier that peeks through a bend in the fjord. Or board a kayak or paddleboard and glide across these iceberg-studded waters, on the lookout for otters, bald eagles and harbour seals.

Talks and Photo Tips

Head to the lounge for a talk on smartphone photography by your National Geographic certified photo instructor. Stick around for a naturalist presentation on their topic of expertise, such as the dynamics of area orca pods.

Lunch: A Fresh Catch

Ship chefs use fresh, local ingredients whenever possible, including locally grown produce and fresh-caught fish. Savour an Alaska-inspired lunch, like a grilled salmon sandwich or a salad featuring harvested wild berries.

Afternoon Excursion: Rainforest Walk

Put your new photo tips to the test during a walk through Tongass National Forest, the world's largest temperate rainforest. Snap photos as you stroll amid blooming wildflowers, or choose a path less travelled, bushwhacking through thick brush.

Afternoon Talk: Ice Cream Sundae Glaciers

Back on board, young travellers in the National Geographic Global Explorers programme have the chance to watch as a naturalist uses ice cream sundaes to demonstrate how glaciers form and change—then they're invited to take a bite out of the delicious display.

Downtime: On Whale Watch

With free time, take advantage of the ship's amenities: read up on regional flora in the library, visit the open Bridge or stand on deck to watch for whales. You may spot humpbacks engaged in a uniquely Alaska behaviour: cooperative bubble-net feeding. When conditions are right, a naturalist drops a hydrophone so you can listen in on the whale communications.

Ready for Recap

Gather in the lounge for drinks and hors d'oeuvres, followed by the nightly recap and a preview of tomorrow's activities. Today's presentation features your undersea specialist, who shares footage from the day's dive of the surprisingly colourful creatures that thrive in these nutrient-rich waters.

Dinner: Crab Feast

A culinary event that always earns rave reviews is the Dungeness crab feast—a mouth-watering taste of Alaska's wild bounty, washed down with local craft beers.

Adventures Under the Midnight Sun

Take advantage of the summer's lingering sunlight to capture golden hour photos or look for wildlife. If you're travelling later in the season, you may have a chance to spot the northern lights painting the night sky.

Small and nimble vessels bring you to the wildest parts of coastal Alaska so you can explore where few others have been before.

ALASKA EXPEDITIONS AT A GLANCE

BAJA CALIFORNIA

Called “the world’s aquarium” by the legendary oceanographer Jacques Cousteau, Baja California is known the world over for its profusion of sea life. Sailing these waters is akin to setting out on a marine safari, where dolphins, humpbacks and grey whales vie for your attention, and snorkelling excursions invite you to witness sea lions and massive swirls of schooling fish.

While the sapphire waters always beckon, the bordering shores and desert isles reveal unexpected wonders—a sculpted volcanic landscape that wears the imprints of time and harbours endemic species found nowhere else on Earth.

More than 40 years ago, Lindblad Expeditions pioneered expedition travel here—a place where the desert meets the sea in captivating contrast. Venture to this unique wilderness that is blissfully remote, yet close to home, and explore it alongside the expert naturalists who know the region best.

A DAY IN BAJA CALIFORNIA

Your expedition is filled with wildlife sightings at sea, and shore excursions to cactus-backed beaches and vibrant seaside towns.

Early Risers: The Green Flash

With clear desert skies and vast ocean views, Baja California is the ideal place to witness the green flash, a rare optical phenomenon where the sun takes on a greenish tinge just before appearing—or disappearing—over the horizon. Nearly every morning, a naturalist is posted up on the bow, helping travellers catch the exact moment the flash might fill the sky.

Breakfast With Blue Whales

Marine mammals are most active in the morning, and ship spotters work through breakfast so you don't miss a sighting. If they spot a blue whale or other charismatic megafauna, the dining staff happily pauses service for travellers who want to take a look.

Morning Excursion: The World Beneath the Waves

Dive into Baja California's sapphire seas to view its creatures up close, snorkelling with sea lions and schools of jackfish in marine conservation areas. In the sheltered lagoons of the Pacific Coast, more than 20,000 grey whales gather in the winter to give birth and raise their young. Here, you'll board local pangas to observe these curious creatures at water level—one of nature's most spectacular wildlife encounters.

Downtime: Whales, Whales, Everywhere

Every winter, the waters surrounding the Baja California peninsula teem with cetaceans—from fin whales to humpbacks and California greys. Whale watching is always an option during the daylight hours, often turning quiet stretches at sea into some of the most exciting moments of your expedition.

Lunch Is Served

Ship chefs use fresh, local ingredients whenever possible, including sustainably caught fish and desert produce from the Baja California peninsula. Be sure not to miss the fresh ceviche or the fish tacos.

Afternoon Excursion: Exploring Desert Islands

Baja California's desert islands shelter endemic species like the spiny-tailed iguana and the black jackrabbit, plus a surprising array of blooms and succulents. Choose from a variety of naturalist-led activities: go birding or beachcombing along the sand, hike through an arroyo lined with massive cardón cacti or climb into a kayak or paddleboard for a closer look at coastal cliffs.

Ready for Recap

This evening's edition of the daily recap features a presentation from young travellers in the National Geographic Global Explorers programme, who link arms across the lounge to demonstrate the enormity of a humpback whale skeleton.

Evening Entertainment: Local Music and Margaritas

Head up to the sun deck for happy hour margaritas, accompanied by lively tunes from local musicians, who help set the beat for tonight's beach barbecue.

Beach Barbecue

The hotel team has arranged a special treat: a beach barbecue at sunset. The meal is capped off with a bonfire, complete with marshmallows for roasting and stacking s'mores.

Exploration is centred on actively engaging with your environment in a meaningful way so you can return home with a deeper understanding of your destination.

ICELAND

An otherworldly realm that is surprisingly close to home, Iceland showcases the drama of the living Earth like nowhere else. In this land of geological treasures, the brightest gems are found in hidden corners and coves, where waterfalls flow through mossy canyons, glaciers tumble from mountaintops and fjords carve aqueous paths from the sea to timeless fishing villages.

There's no better way to experience authentic Iceland—far from the well-trodden Ring Road—than on an expedition cruise to the country's remote shores. Voyages with National Geographic-Lindblad Expeditions bring you to wide-open wilderness, local luminaries and the less-travelled side of this beloved country.

Go beyond the Blue Lagoon to glimpse Iceland's natural wonders in their wild glory and the daily rhythms of life that have remained much the same for generations.

A DAY IN ICELAND

Discover the centuries-old hamlets of ancient seafarers, hidden forests shrouded in lore, personality-packed puffin colonies and much more.

Breakfast: Feast Your Eyes on a Fjord

Iceland’s rocky coast is carved with more than 100 fjords, many of them found along the country’s remote western and eastern shores. After leaving Reykjavík, you’ll wake up in a new one nearly every day—and they make the perfect backdrop for a fresh breakfast of made-to-order eggs, fresh pastries and porridge and yogurt parfaits with all the fixings.

Morning Excursion: Witness the Earth in Action

Amid Iceland’s elemental landscapes, there are a multitude of ways to interact with the living Earth. On a morning excursion, you might walk along a fjord to a thundering waterfall, Zodiac cruise around basalt cliffs studded with seabirds or climb to the rim of a volcanic crater.

Downtime: Scenery at Sea

There’s plenty to see from the ship, and while you’re relaxing, you may hear your expedition leader call out notable landmarks over the loudspeaker. Among them are Surtsey—one of the world’s youngest islands—and the monument on Grimsey island that marks the border of the Arctic Circle. Whales are also plentiful in these parts, and your captain may stop the ship to watch a pod of orcas, humpbacks or fin whales.

Lunch Is Served

Select from a lunch menu of diverse options that can be tailored to your taste and dietary preferences. Many meals start with a robust soup to ward off the Icelandic chill.

Chat With the Captain

Attend a naturalist talk in the lounge or take advantage of the ship's amenities: read up on geology in the library, test out high-tech cameras from the complimentary OM System Photo Gear Locker or visit the open Bridge to chat with the captain about Arctic navigation. Young travellers in the National Geographic Expeditions Adventurers programme are invited to join their certified field educator in using the ship microscopes to examine plankton gathered on the morning Zodiac cruise.

Afternoon Excursion: Local Icelandic Life

Voyages offer a rare look at the age-old customs that thrive in the country's remote rural corners. Alongside local Icelanders, delve into traditions like eiderdown processing and herring fishing. Your expedition may also feature a special cultural expert—such as a professor or politician—who joins you throughout the journey to share insights into local Icelandic life.

More to Explore: Get the Perfect Puffin Photo

Several landing sites harbour puffins,* and when you spend time at the edge of their nesting cliffs, keeping as still as possible, they get used to your presence and flutter about their business. Post up alongside your National Geographic photographer and they'll show you how to adjust your shutter speed to get the perfect picture.

Ready for Recap

Meet in the lounge over drinks and hors d'oeuvres, and settle in for the daily recap, featuring presentations and slideshows on the day's adventures and a preview of tomorrow's activities.

Dinner and a Show

Nosh on Nordic cuisine at dinner, sampling a local fish sustainably caught and perfectly prepared by your ship's chef. This evening's entertainment features a local musician hand-selected by the fleet's ethnomusicologist, Jacob Edgar, who curates unique performances that incorporate traditional elements of Icelandic culture.

*Puffins can be seen in Iceland between mid-April and mid-August.

Exploring Iceland by small ship opens an entirely new realm of possibility, taking you to the far-flung, unspoiled corners of this enchanting subarctic isle.

ICELAND EXPEDITIONS AT A GLANCE

| | |
|---|---|
|  8 ITINERARIES | 6 to 18 days Visit expeditions.co.uk/iceland |
|  FEATURED EXPEDITIONS | Exploring Iceland: Fjords, Waterfalls and Wildlife From £5,235pp 6 Days Fire and Ice: An 8-Day Sail Around Iceland From £7,045pp 8 Days A Circumnavigation of Iceland From £14,489pp 10 Days North Atlantic Wonders: Iceland, Scotland and the Faroes From £9,125pp 11 Days Coastal Wonders of Norway, the Faroe Islands and Iceland From £15,959pp 15 Days |
|  SHIPS | <i>National Geographic Endurance</i> • 138 Guests <i>National Geographic Resolution</i> • 138 Guests <i>National Geographic Explorer</i> • 148 Guests |
|  WHEN TO GO | May-September Snow melts into rushing waterfalls in springtime. Puffins arrive in mid-April and stay until mid-August, and whales swim here in the summer. September's diminishing daylight means more chances to spot the northern lights. |
|  AVAILABLE EXTENSIONS | Reykjavik's Golden Circle and Blue Lagoon; 2026 Eclipse |
|  SPECIAL OFFERS | Ongoing offers: <ul style="list-style-type: none">• £395pp off children under 18.• 5% off groups of 8 or more.• 10% off consecutive back-to-back voyages. See page 62 or visit expeditions.co.uk/offers for details, terms and conditions. |

CENTRAL AMERICA

Studded with smouldering volcanoes, carved by falling water and draped in a thousand shades of green, Central America harbours a pristine tropical wilderness that is delightfully close to home. The nimble ships in the National Geographic-Lindblad Expeditions fleet offer new perspectives on the region, taking you deeper into its secret spaces—from empty golden beaches to mangrove forests aflutter with birdlife.

Voyages marry exploration of Central America's epic nature and rich Indigenous cultures. You might spend a day at a thatched Guna village in Panama learning about local artisan traditions, or you may be treated to a folkloric performance in Colombia.

Embark on an expedition to wild isles and tropical shores, where adventure beckons from cliff to cove and passionate experts lead the way to unexpected encounters.

A DAY IN CENTRAL AMERICA

From rainforests aflutter with hummingbirds to reefs swirling with kaleidoscopic fish, Central America bursts with biodiversity—and the fleet brings you to its wildest corners.

Breakfast: Rise and Dine

A fresh breakfast awaits in the dining room: Costa Rican coffee, bespoke omelette, a rainbow of juices and fruits and more—much of it sourced as you sail from local purveyors as part of the fleet’s sustainable food programme.

Morning Excursion: Choose Your Own Adventure

This morning, opt to set out straight from the ship, discovering a nearby mangrove forest by kayak or paddleboard. Or go ashore for a visit to a local Indigenous village. Delve into local customs and traditions—from the intricately stitched *mola* of Guna Yala to the *sombrero vueltiao* of the Zenú people—and learn about how each community is intertwined with its natural surroundings.

A Local “Blue Zone” Lunch

Ship chefs use fresh, local ingredients whenever possible, including locally grown tropical produce and fresh-caught fish. Try a healthy veggie dish that incorporates the “three sisters”—corn, beans and squash—inspired by the nearby Nicoya Peninsula of Costa Rica, named a “Blue Zone” for the high number of centenarians who live there.

Afternoon Excursion: Underwater Exploration

In the heat of the day, the turquoise waters are calling. Gear up with your dedicated mask and fins, and dive in for a refreshing snorkel. The reefs in Central America teem with multiple species of sea turtles, brightly coloured galaxies of tropical fish and other marine life, such as rays, sharks and dolphins.

Explore More: Visit a Renowned Research Station

Since 1932, biologists from across the globe have travelled to Panama's Barro Colorado Island to study its lush lowland tropical forests. On a visit ashore, your travel group is exclusively invited to a talk with members of the Smithsonian Tropical Research Institute's roster of resident scientists. Take a guided walk through the rainforest, on the lookout for three-toed sloths, capybaras and a host of rare and reclusive creatures. Remember to put your eyes on the sky: the canopy here harbours around 400 species of birds.

Ready for Recap

Gather in the lounge for drinks and hors d'oeuvres, followed by the nightly recap and a preview of tomorrow's activities. This evening you might hear from a naturalist, who shares information on how the health of the ecosystems in Panama impact the Panama Canal.

Dinner Is Served

Dine on more Central American specialities this evening, from ceviche and tamales to *rondón*, a seafood stew with a coconut milk base, served with a drizzle of fresh lime and a side of rice.

Evening Entertainment: Panama Canal Crossing

In advance of your Panama Canal crossing, the ship overnights in the Canal Zone, giving you the unique opportunity to spend time on deck taking in the spectacle of the canal's dazzling after-dark illuminations. Tomorrow, you'll sail the locks for a closer look at the intricate workings of this engineering marvel.

Voyages bring you up close to world wonders
so you can see them from a new perspective.

THE MEDITERRANEAN

The Mediterranean dazzles with sun-drenched shores, cerulean seas and ancient relics that bring great civilizations to life. Aboard the nimble *National Geographic Orion*, encounter famed destinations and lesser-known gems, from iconic Santorini to outlying Croatian isles and vestiges of antiquity in Albania and Turkey. Explore fascinating UNESCO World Heritage sites, stroll among medieval towns and delve into powerful empires from the past—all guided by passionate experts who illuminate the secrets and stories of the Ionian and Adriatic Seas.

No Mediterranean journey would be complete without an exploration of the region's culinary delights. In 2025, each expedition is designed as part of a popular wine collaboration with Food & Wine magazine. Sail to an array of destinations celebrated for their epicurean treasures, indulging in exquisite flavours as you delve into the sustainable food and wine customs that are central to the region's rich culinary culture.

A DAY IN THE MEDITERRANEAN

Medieval cities, hill-top castles and picturesque ports—the treasures of the Mediterranean are seen in their full splendour aboard *National Geographic Orion*.

A Fresh, Local Breakfast

Food is a focal point of your experience here, and you'll discover culinary traditions at every meal—including breakfast—as you sample classic dishes made with fresh ingredients procured from local farmers.

Morning Excursion: Water Sports

For the traveller who is equally passionate about fine cuisine and exploring rocky coves and cerulean seas, the expedition offers plenty of opportunities to get out on the water. Kayak, paddleboard or Zodiac cruise with a naturalist guide along the limestone cliffs and golden sands of these storied shores—then, if you wish, cool off with a refreshing dip.

Morning Photo Talk

Meet your National Geographic photographer in the lounge for a talk on the capabilities of smartphone cameras. Then join them in testing out the high-tech cameras and lenses available for loan in the complimentary OM System Photo Gear Locker.

Lunch al Fresco

In this corner of the world, you will want to spend every spare moment possible luxuriating in the warm sun and delightful sea breezes—which is why lunch is served al fresco whenever the weather allows for it. There are plenty of sights to take in at sea; for instance, on select Greek itineraries, you may dine as the captain navigates the iconic Corinth Canal, a spectacularly scenic cut inaccessible to larger ships.

Afternoon Excursion: Culinary Experiences

Voyages are filled with opportunities for special food experiences on shore, including a cooking class and wine tasting in the Greek Isles, a Turkish coffee ceremony in Bodrum and an opportunity to go oystering in a quiet bay near Dubrovnik.

More to Explore: Historical Sites

This corner of the world is brimming with landmarks, some legendary, others little-known. Alongside a National Geographic Destination Expert and onboard local cultural experts, explore places like the well-preserved ancient city of Ephesus or the Temple of Apollo at Delphi, the centre of the world in ancient Greek mythology.

Evening Wine Tasting

For 2025 departures of these special culinary voyages, the onboard wine list features 40 of the region's best wines, each personally selected by *Food & Wine* magazine's Executive Wine Editor, Ray Isle. This evening, enjoy a tasting of selections from the collection. For those who prefer to skip the sips, the top deck hot tub is the perfect place to take in sunsets.

Ready for Recap

Gather in the lounge for drinks and hors d'oeuvres, followed by the nightly recap and a preview of tomorrow's activities. Today's presentation features a discussion on the origin and evolution of classic dishes from your destination.

Dinner

Every meal on board is guided by the rhythms of the seasons and incorporates fresh, sustainable ingredients exclusively sourced from your surroundings. Indulge in a gourmet dinner inspired by the classic dishes of your destination, from the seafood and pasta of Sicily and Sardinia to the grilled meats of Greece.

Each 2025 Mediterranean departure aboard *National Geographic Orion* is accompanied by both a National Geographic photographer and a National Geographic Destination Expert with in-depth knowledge of the region.

THE FLEET

THE NATIONAL GEOGRAPHIC- LINDBLAD EXPEDITIONS FLEET

Meet the fleet of ships that charted a course for expedition cruising, each built small and nimble so you can go deeper into your destination and quickly disembark to spend more time exploring. The vessels are as diverse as the destinations—designed to discover specific geographies and stocked with curated expedition tools to enhance exploration. While their offerings are varied, key features unite the ships: comfortable, well-appointed cabins; lively social spaces that foster community; and capacities that never exceed 148 guests.

GALÁPAGOS SHIPS

Four expedition ships sail the Galápagos year-round, each with a unique style. The purpose-built *National Geographic Endeavour II* and *National Geographic Gemini* embody the type of travel refined during more than 55 years of exploration here, while *National Geographic Islander II* has the spirit and soul of a private yacht. The intimate catamaran *National Geographic Delfina* accommodates just 16 guests in eight spacious staterooms.

CHARTER SHIPS

Certain destinations are best discovered aboard bespoke vessels that evoke the splendour of their historic ports of call. National Geographic-Lindblad Expeditions handpicks ships that are uniquely suited to sail in these special places and fully charters them just for your travel group.

BLUE WATER SHIPS

The four blue water ships comfortably sail oceans from pole to pole. *National Geographic Explorer* is the definitive expedition ship, while the *National Geographic Orion* provides an intimate travel experience. The state-of-the-art sister ships *National Geographic Endurance* and *National Geographic Resolution* are charting a course for the future of the fleet, with top-tier ice classes and luxurious amenities.

U.S. SHIPS

Two sets of sister ships make up the U.S. fleet: the purpose-built *National Geographic Quest* and *National Geographic Venture* and the intimately scaled *National Geographic Sea Bird* and *National Geographic Sea Lion*. Each has the advantage of being U.S.-flagged, eliminating the need for domestic customs stops and allowing you more time to explore.
