LAKE KARIBA DAM

LAND SAFARI

DID YOU KNOW?

The legend of the river god Nyaminyami haunts the tales told within the valley and along the river bends of the Zambezi River and Lake Kariba. He provided water and food for the tribespeople settled along the banks

When the dam was built in the 1950s, tens of thousands of these tribespeople were forced to move elsewhere

The dam was built over the rock where they believed Nyaminyami lived and anyone who came near this rock would be subject to his wrath

When several tragic events touched the construction of the dam, many locals attributed them to offenses against him

Although many people still evoke his presence as a spirit, he is nowadays considered a protector of the lake and its inhabitants

This safari-cruise takes you on an intimate journey into the heart of nature and up close to its fabulous treasures. In perfect harmony with its authentic environment and the splendid scenery of protected sites, it offers a permanent spectacle, both on land and on board. An enchanting and timeless voyage, far from the sound and the madness of the world.

CHOBE NATIONAL PARK

Chobe National Park, which covers almost 11,000 km² (4247 mi²) has some of the finest game viewings in Africa, including the largest concentration of elephants on the continent. Over 250 species within the animal kingdom roam this immense reserve due to a wide variety of habitats and rich plant life.

THE SAFARIS

Two types of safari experiences are offered:

- Water safaris on small crafts accommodating 16 passengers.
- Land safaris in open-air, four-wheel-drive vehicles. This provides the best conditions for taking photos.

The safaris are set up to delve into the hidden world of the nature and wildlife found within the various parks and waterways.

Sense the anticipation and awe rise as the vehicles and crafts move in closer to observe a herd of elephants, a pair of giraffes, a single crocodile, or a majestic African sea eagle.

LAKE KARIBA

Lake Kariba (5400 km²/2085 mi²) is a human-sculpted feat that contains 293 small islands and an impressive array of wildlife.

On its southern shores is the Matusadona Park, an area of great natural diversity, which was created as a result of "Operation Noah", which saved thousands of animals after a hydroelectric dam was built and the Zambezi Valley was flooded.

This non-hunting, protected area is home to rare specimens of giant crocodiles, as well as elephants, buffalos, hippos and many other species.
