THE RHÔNE

THE RESOLUTE SAÔNE

Flowing 300 miles from the Vosges mountains and considered the boundary between eastern and western France, the Saône is the quintessential French waterway. It has supported trade and commerce since prehistoric time; pleasure boating since the late-19th century; fishing for pike, perch, and trout; and some of the world's best wines in the Beaujolais and Burgundy regions. The river is both gentle and genteel, ambling past poplar forests, moors and vineyards, grazing Charolais cattle, and colorful villages where residents sip café au lait in centuries-old squares. Also dotting the Saône's environs are world-class cities such as Chalon-sur-Saône, Mâcon, Tournus, and Lyon – and countless churches, both august and humble, giving the river an almost biblical feel. Yet even with grand highlights such as these, the Saône today remains a smaller, quieter river. Not quite a fleuve, according to the French, but a rivière ...

ELEGANT AND GRACEFUL.

THE SAÔNE

THE ALLURING RHÔNE

From its glacial source in the Swiss Alps to its final rush into the Mediterranean Sea, the Rhône courses over 500 miles, finally dividing in the South of France and creating the Camargue, Western Europe's largest river delta. Its landscape is a dream, flowing through some of France's most beautiful regions – Burgundy, Rhône-Alpes, and into Provence. Enchanting cities such as Arles and Avignon line its banks, beavers and river otters reside in its wetlands, and its arms cradle its delta, where flamingos strut through salt lakes and wild horses roam freely. As important as majestic, over the centuries the Rhône has served as a waterway where wine was transported in the Middle Ages as well as olive oil and marble from Italy. In 2003, the river's ancient past revealed itself just a little more as six small, 1st-century ships were discovered during construction work in Lyon. Today, the Rhône has become a special place for epicures and those who appreciate fresh breezes with hints of lavender and herbs ...
